

ARGHADIP MUSTAFI

arghadipmustafi98@gmail.com • 07587676056 • London, UK

MSc Cyber Security graduate (Distinction) with a strong background in technical pre-sales and solution implementation. Combines practical expertise in secure workflow automation, SaaS integration, and network analysis with commercial experience in client delivery. Adept at bridging the gap between technical security requirements and business operational goals. Seeking a challenging role that leverages both technical acumen and client-facing skills to drive secure, efficient digital transformation.

EDUCATION

[Link](#)

King's College London (London, UK) MSC Cyber Security	GRADE: Distinction	09/2024 - 11/2025 73/100
Key Modules & Labs: Security & Penetration Testing, Network Security Hardening, Computer Forensics, Security Engineering and Cryptography.		
Techno India Salt Lake (Kolkata, India) B.Tech in Computer Science Engineering	GRADE: Distinction	11/2020 - 06/2023 8.42/10
- Key Modules: AI & Machine Learning, C Programming, Java Programming, Database Management. - Key Project: Developed a sentimental analysis model for Amazon product reviews, applying ML techniques to categorize and interpret customer feedback.		
SCM Institute of Technology (Kolkata, India) Diploma in Computer Science Engineering	GRADE: Distinction	11/2017 - 06/2019 74.2/100
- Key Modules: Computer Architecture, System Maintenance, Operating Systems, Networking Fundamentals. - Hands-on Coding & Support: Applied foundational programming (C/C++) and hardware troubleshooting techniques to solve practical technical challenges, bridging the gap between software logic and physical infrastructure.		

TECHNICAL SKILLS

- Cloud** - SIEM, Azure (Entra ID), AWS, GCP, Docker, VMware, VirtualBox, Cloud Security Architecture
- Security Tools** - Splunk, Tenable Nessus, Nmap, Wireshark, Burp Suite, Metasploit, SQLmap, OWASP ZAP, MITRE ATT&CK DB SIEM, Autopsy (Forensics)
- Scripting & Languages** - Bash, Python, Java, C, C++, HTML, CSS, PHP
- Databases** - SQL, MySQL, Oracle PL/SQL
- Reporting & Documentation** - Microsoft Office 365, Power BI, Power Automate, PowerApps
- Pre-Sales & GRC** - Technical Scoping, CRM, RFP/SOW Writing, Stakeholder Management, Report Visualization, ISO 27001 Awareness, GDPR Compliance, Snaplogic
- Operating Systems** - Windows, Linux (Kali, Ubuntu, Parrot, RHEL).

CERTIFICATIONS

[Link](#)

ISC2 Certified in Cyber Security | Data Visualization with Power BI | Cloud Security and Audit Fundamentals: AWS Microsoft Azure Google Cloud | Dynamic Application Security Testing | Learning Linux Shell Scripting | Metasploit | Burpsuite | Wireshark | Advanced JAVA | PHP & MySQL

RESEARCH PROJECTS

Biometric Authentication using Quantum Fingerprinting	2025
Developing a quantum fingerprinting-based biometric authentication system resistant to quantum attacks	
The Safety Paradox: Reclaiming Consent in a Digital World	2025
- Researched integration of consent frameworks (e.g., FRIES) into digital platforms - Proposed privacy-focused design improvements to support safe image exchange	
<i>To be published</i>	
Sentimental Analysis on Amazon product reviews [Link]	2023
- Built NLP models to classify sentiment in Amazon product reviews and applied ML techniques and visualized trends using Python (Scikit-learn, NLTK) - Achieved over 95% classification accuracy using Support Vector Machine (SVM) and TF-IDF vectorization	

WORK EXPERIENCE

Implementation Consultant | Enate

02/2026 - Present

- Designed and engineered integrations with legacy systems to automate business workflow management.
- Developed and deployed Snaplogic and Power Automate pipelines to transform dataflow to upstream systems.
- Collaborated with multiple cross functional teams for solution deployment and integration.
- Communicated effectively to senior stakeholders regarding relevant business KPIs.

Student Researcher | King's College London

04/2025 - 11/2025

- Project Focus: Biometric Authentication using Quantum Fingerprinting (Supervised by Prof. Tasmina Islam).
- Advanced Threat Defense: Developing a quantum fingerprinting-based biometric authentication system explicitly designed to be resistant to quantum computing attacks, demonstrating foresight into emerging security threats.

Student Ambassador | King's College London

11/2024 - 11/2025

- Public Speaking & Presentation: Delivered engaging campus tours and presentations to diverse groups of prospective students and parents, demonstrating the ability to communicate value and influence decision-making.
- Stakeholder Engagement: Acted as a brand representative for the Cyber Security department, handling queries and overcoming objections regarding course content and university life—mirroring pre-sales objection handling.
- Event Support: Collaborated with the marketing team to facilitate open days, ensuring a seamless experience for visitors and contributing to recruitment targets.

Solutions Consultant | Enate

04/2023 - 08/2024

- Engineered and automated key business workflows, significantly reducing manual intervention and improving process efficiency for client solutions.
- Provided deep technical expertise during the pre-sales process, focusing on designing and demonstrating the value of automated orchestration solutions.
- Collaborated with various cross-functional teams to troubleshoot complex issues, analyze client requirements, and streamline processes, leading to increased customer satisfaction.
- Developed comprehensive technical documentation, RFPs, POCs and presentations to support sales and solution delivery efforts.
- Deployed and configured workflows and automations for business processes integrating different legacy and modern systems.

Associate Intern | Enate

01/2023 - 03/2023

- Conducted in-depth product analysis and feasibility studies to align Enate solutions with customer needs.
- Collaborated with sales teams to identify client needs, tailor product demonstrations, and deliver compelling technical presentations.
- Trained under experienced professionals gaining valuable insights and hands-on expertise in pre-sales and technical solutions.

CTF'S

- **Singapore Students Merger CTF (SSMCTF)** - Completed a 36 hours global CTF, solving challenges in Steganography, network analysis, and reverse engineering.
- **Portico Hack (UCL)** - Tackled Cryptography, OSINT, binary exploration and vulnerability analysis.
- **Hack The Lion (KCL)** - Participated in a CTF stimulating real world cyber attack/defense, working on web exploration, forensics and reverse engineering as a team.
